

API DOCUMENTATION

Tabaarak SMS Gateway API – Professional Developer Documentation

Introduction

The Tabaarak SMS Gateway API is a secure, high-performance platform built for developers and businesses looking to integrate SMS messaging, contact management, and mobile wallet payment systems. Designed to be developer-friendly, modular, and scalable, the API simplifies communication workflows and provides essential tools for digital engagement.

Purpose

To deliver a unified solution for SMS communication, contact group management, and digital payment processing through a simple, secure API interface.

Target Users

- Software Developers & Integrators
- Government & NGOs
- Educational Institutions
- Telecom Service Providers
- Business Enterprises
